DETAILED ACTION

Election/Restrictions

1. Applicant's election with traverse of claims 6-16 in the reply filed on 10/26/04 is acknowledged. The traversal is on the ground(s) that the search and examination can be made without serious burden. This is not found persuasive because the search for one group is not required for the other as indicated in the previous office action. In addition, claims 6-16 are directed to the structure of the air gap while claims 1-5 and 17-19 are directed to the structure of the rotor hub

The requirement is still deemed proper and is therefore made FINAL.

Conclusion

2. This application is in condition for allowance except for the following formal matters:

Canceled non-elected claims 1-5 and 17-19.

Prosecution on the merits is closed in accordance with the practice under *Ex parte Quayle*, 1935 C.D. 11, 453 O.G. 213.

A shortened statutory period for reply to this action is set to expire **TWO MONTHS** from the mailing date of this letter.

Allowable Subject Matter

3. Claims 6-16 are allowed.

4. The following is a statement of reasons for the indication of allowable subject matter: the record of prior art does not show a gas dynamic bearing motor comprising a stationary shaft and a rotor assembly with an outer diameter of said stationary shaft is

Art Unit: 2834

constant in an axial direction thereof, while a diameter of the inner circumferential surface of said rotor assembly changes in an axial direction thereof when no recording disk is loaded on the disk receiving portion so that a clearance between the outer circumferential surface of said stationary shaft and the inner circumferential surface of said rotor assembly is almost constant in the axial directions thereof when the recording disks are loaded on the disk receiving portion.
